

Mark 33 Series

Electric Motor Control Valves

The Mark 33 is a motor operated valve featuring the Jordan sliding gate seat and heavy-duty industrial motors for proportional (resistance), on-off, 4-20mA electronic control. Models include the Mark 33 in sizes 1/4" through 2" (DN8 through DN50), the high flow Mark 331/332 with Cv's up to 70 *60 Kv), and the Mark 39 with three-way body.

The Mark 33 delivers exceptional pressure drop capabilities due to the short stroke of the sliding gate seat which permits greater utilization of the motor torque output. Power is transmitted via a cam (instead of gears), allowing the valve to handle higher than usual pressure drop conditions. The 24 VAC 50/60 Hz Honeywell actuators are split-phase, capacitor-type enclosed in a gasketed die-cast magnesium housing that is rated NEMA 3.

The Mark 331/332 electric motor operated control valves feature high capacities in relation to line size. With Cv's up to 70 (60 Kv) in a 2" (DN50) valve, the Mark 331/332 combines the superior accuracy of the sliding gate seat design with the heavy-duty Honeywell electric motor for reliable, long-term operation.

FEATURES

- Heavy-duty industrial grade motor:
 - Die-cast magnesium housing
 - NEMA 3 (weather protection) rated
 - UL® listed and CSA approved
 - Oil emmersed motor and gear train for long-term, reliable performance
- Sliding Gate Seats — features advanced sliding gate seat technology.
 - Straight-through flow reduces turbulence for long life, quiet operation and excellent rangeability
 - Short stroke for fast response and accurate regulation.
 - Interchangeable seats for easy maintenance and Cv changes
 - Tight Shutoff (ANSI Class IV) due to overlap of seat closure area

CRN Registration Number Available

SPECIFICATIONS

Sizes

- MK33: 1/4" through 2" (DN8 through DN50)
Note: 1/4" & 3/8" sizes uses 1/2" body with reducers
- MK331/332: 1-1/2" & 2" (DN40 & DN50)

End Connections

- Threaded
- Flanged

Body Materials:

- Ductile Iron
- Bronze
- Carbon Steel
- Stainless Steel

Trim Materials:

- 303SS for DI, BZ or CS body valves
- 316SS for SS body valves

Seat Materials:

- Jorcote on SST — Standard
- Chrome Plated SST — Optional

SPECIFICATIONS (CON'T)

Packing: Spring loaded Teflon (to 500°F/260°C); braided (above 500°F/260°C)

Service: steam, water, air, oil, gas and chemicals

Shutoff: ANSI Class IV

Seat Interchangeability MK331/332: 1-1/2" with 2" (DN40 with DN50)

Power Requirements: 24 VAC, 50/60 Hz (optional transformer required for 120 VAC)

Command Signals: proportional control (0-135 ohms); on-off control; current command (4-12, 4-20, 12-20 mA DC standard); voltage command 2-10 VDC

Operating Time (approximate): 30 seconds

Ambient Temperature Limit for Motors: -40°F to 150°F (4,4°C to 66°C)

Options

- Spring return: for controlled failure in the open or closed position; regardless of valve action
- Transformer: for operation on 120 VAC
- Stem position indicator: shows stem motion and valve position between open and closed

Loading Effect for Electric Control

Control Signal (mA DC)	Net Loading Effect on mA Controller (ohms)*
4 - 12	67
4 - 20	67
12 - 20	67

Caution: Check controller literature to be certain that the controller is compatible with the loading.

Cv (Kv) Ratings and Maximum Allowable ΔP:

Mark 33

Mark 39/39MX Series

Electric Three-Way Control Valves

The Mark 39 is a motor-operated three-way control valve that combines the performance and excellent shutoff characteristics of the Jordan sliding gate seat with the time-proven quality of the Honeywell industrial motor. Available for either diverting (Mark 39) or mixing (Mark 39MX) service, the Mark 39 utilizes two sets of seats to handle higher than usual pressure drops while maintaining ANSI Class IV shutoff.

FEATURES

- Heavy-duty industrial grade motor:
 - Die-cast magnesium housing
 - NEMA 3 (weather protection) rated
 - UL® listed and CSA approved
 - Oil emmersed motor and gear train for long-term, reliable performance
- Sliding Gate Seats — features advanced sliding gate seat technology.
 - Straight-through flow for reduced turbulence and quiet operation
 - Short stroke for fast response and accurate regulation.
 - Easy interchangeable Cv's
 - Tight shutoff due to overlap of seat closure area

SPECIFICATIONS

Sizes: 1-1/2" & 2" (DN40 & DN50)

End Connections

- Threaded
- Flanged

Body Materials

- Carbon Steel
- Stainless Steel

Trim Materials

- 303SS
- 316SS

Seat Materials

- Jorcote on SST - Standard
- Chrome Plated on SST - Optional

Packing: Spring loaded Teflon (to 500°F/260°C); braided (above 500°F/260°C)

Service: Steam, water oil, gas, air, chemicals

Shutoff: ANSI Class IV

Seat Interchangeability: 1-1/2" with 2" (DN40 with DN50)

Power Requirements: 24 VAC, 50/60 Hz (optional transformer required for 120 VAC)

Command Signals: Proportional control (0-135 ohms); on-off control; current command (4-12, 4-20, 12-20 mA DC standard); voltage command 2-10 VDC

Operating Time (approximate): 30 seconds

Ambient Temperature Limit for Motors: -40°F to 150°F (4,4°C to 65,6°C)

Flow Paths

- Mark 39

- Mark 39MX

Loading Effect for Electric Control

Control Signal (mA DC)	Net Loading Effect on mA Controller (ohms)*
4 - 12	67
4 - 20	67
12 - 20	67

Caution: Check controller literature to be certain that the controller is compatible with the loading.

Cv (Kv) Ratings and Maximum Allowable ΔP:
